## ENDYMED **PURE**—fractional skin resurfacing and tightening for damaged and aged skin

Ideal for dull lack-lustre skin with uneven skin tones and texture. It is perfect for the face and the upper lip and eye areas. For your comfort a topical anaesthetic cream is applied before treatment which means appointments take 60 to 75 minutes. An initial course of 3 treatments is recommended, normally 4 to 6 weeks apart. Immediately after treatment you will experience some redness which can last up to 2 days. You may also develop micro-crusting as the skin cells renew and the resurfacing takes place—can last 3 to 5 days but is easy to cover with makeup.
